Technical	HTML, CSS, JavaScript, React.js, Node.js, MongoDB, Git, GitHub, Tailwind CSS, Bootstrap
Business	Vendor Negotiation, Market Research, Inventory Management, Internal Auditing, Contract Negotiation, Sales

PROFESSIONAL EXPERIENCE

Project Manager | The Real Tech (TRT) *2024 – 2025*

- Directed the end-to-end delivery lifecycle for custom website projects, coordinating handoffs across sales, content, development, support, and SEO teams.
- Led web developers building custom client websites, overseeing timelines, revisions, quality assurance, and final customer handoff.
- Served as the primary liaison between customer support and development teams, triggering client revisions through developer fixes and final approval.
- Assigned and tracked content-creation tasks after sales closure and coordinated completed projects with the SEO team for continuity.
- Oversaw 100+ concurrent website projects per month across the production pipeline while maintaining delivery timelines and client satisfaction.

Business Development Executive | TAWA Estate *2018 – 2023*

- Presented properties to prospective buyers and guided clients through the purchase decision process.
- Negotiated contracts and managed sales activities through deal completion, including fee collection and payment documentation.
- Maintained ongoing client relationships to support repeat and referral business.

Manager, Branch Operations (Retail) | Meat N More *2013 – 2017*

- Managed inbound and outbound stock levels, purchasing, staff supervision, customer-service standards, and merchandise presentation.
- Negotiated vendor pricing through market research to reduce costs and improve margins.

Assistant Internal Quality Auditor | United Management Consultants *2008 – 2013*

- Assisted senior auditors with internal audits, audit plans, schedules, reporting, and presentation of findings.
- Identified non-compliance issues, evaluated corrective actions, and supported employee training on quality-control standards.

Assistant Administration Manager | United Management Consultants *2004 – 2008*

- Managed office inventory and vendor orders, meeting logistics, correspondence, reports, presentations, and expense/capital-expenditure records.

FEATURED PROJECT

Personal Developer Portfolio — Salman Ameer | Live: https://salmanameer-webdev.vercel.app

- Designed and deployed a professional personal portfolio website to showcase MERN Stack development capabilities, technical skills, professional experience, web development projects to showcase my expertise in developing premium and responsive websites according to modern business needs of prospect customers.
- Built a responsive portfolio experience focused on clear presentation of technical skills, professional background, and project work.
- Structured the site as a central professional profile for recruiters and clients, complementing the resume with an interactive online presence.
- Deployed the portfolio on Vercel and included it as a live portfolio link for direct review of web-development work.

Car Rental Platform | React.js, Tailwind CSS, Supabase, Netlify | Live: https://rentride-rentals.vercel.app

- Developed a responsive car rental platform using React.js and Tailwind CSS, featuring vehicle search, browsing, and rental booking functionality.
- Integrated Supabase Authentication, PostgreSQL, and Storage for secure user access, persistent data management, and asset storage.
- Built role-specific user and admin dashboards for reservation management and administrative operations.
- Implemented complete fleet listing management with CRUD functionality, enabling administrators to add, edit, and delete vehicles.
- Deployed the application on Vercel, delivering a live, accessible web experience.

Multi-Category E-Commerce Platform | React.js, Tailwind CSS, Supabase, Vercel | Live: https://shopee-estore.netlify.app/

- Developed a responsive e-commerce platform featuring dedicated product categories for men, women, kids, and gadgets, with product search and category filtering.
- Integrated Supabase Authentication, PostgreSQL database, and Storage for user authentication, persistent data management, and product image storage.
- Implemented shopping cart functionality and streamlined product browsing to support the online shopping experience.
- Built a role-based admin dashboard with full CRUD functionality for product listings and centralized order, delivery, and order status management.
- Implemented role-based access control for administrative functionality and deployed the application on Vercel.
